

# ENERGY

The campus carbon footprint (more than 200,000 metric tonnes of carbon dioxide per year) is largely the result of energy use in buildings. Pledge to take action on campus!

# TAKE ACTION!

I pledge to...

- Turn off the lights when I leave the room, and turn off my computer and other electronic equipment when I leave for the day.
- Use daylight or a task lamp with an LED or compact fluorescent bulb and turn off overhead lighting whenever possible.
- Not use a space heater in my office, and to report hot or cold temperature comfort issues to the Thermal Feedback "tile" on [my.ucdavis.edu](http://my.ucdavis.edu).
